Love Eternal

Inkubus Sukkubus

Love, fire of love Burn ever higher Love, fire of love Feed my desire Love, fire of love Born of my sighing You are my daylight You are my daylight You are my firelight You are my firelight You the stars so bright You are what's yet to be You are my memory In war and raging sea You will defend me

Love, fire of love Stay close beside me Burning inside me Love, fire of love Give and take freely Love, fire of love Never deceive me

Love ascending Love eternal Love transcending Life (it can never die) Love and laughter Pain and sorrow Love lives after Life... and death

Take me with you We have forever In love, we two We'll be together Wrapped in your arms I am much braver With strength and charm You are my savior
