

Light Up

Inna

Come see the sunshine, let it shine on you
And this is the skylight tangled up in you
And we go up up up and away
Up up up and we stay
Close to sun, we'll be okay
All of our days
'Cause these are the rays of our life
Please help and raise up, please help and raise up a light

And raise a light in your hands and put your hands up
Tonight wake me up and we have so put your hands up
And we gon light up, light up, light up and love
Light up, light up, light up
Light up, light up, light up and love
Light up, light up
These are the rays of our life

Light up, light up
Light up, light up
Light up, light up
Light up, light up

Come see the sunshine, let it shine on you
And now it's a skylight tangled up in blue
And we go up, up, up and away
Up up up and we stay
Close to sun, we'll be okay
All of our days
'Cause these are the rays of our life
Please help and raise up, please help and raise up a light

And raise a light in your hands and put your hands up
Tonight wake me up and we have so put your hands up
And we gon light up, light up, light up and love
Light up, light up, light up
Light up, light up, light up and love
Light up, light up
These are the rays of our life
Please help and raise up, please help and raise up a light

Light up, light up
Light up, light up
Light up, light up
Light up, light up
