

Live Together

Inner Circle

Live together, live together,
We must all learn to live together.
Live together, live together,
We must all learn to live together

Me and you and my brother,
We should all learn to live together
Me and you and my sister,
We should all learn to live together

A law can't make you love your brother
We the people got to understand each other
Take the steps we know are right,
Got to understand the truth and the right.

Live together, live together we must all learn.
Live together, live together we must all learn.
Live together, live together we must all learn.

Understand is the key to survival
Make me your friend and not a rival
The truth may be an offense but not a sin.

Live together, live together we must all learn.
Live together, live together we must all learn.
Live together, live together we must all learn.

Got to understand where I'm coming from
'Cause I've been through this trip before.
Got to straighten it out cause time is running out.

Live together, live together we must all learn.
Live together, live together we must all learn.
Live together, live together we must all learn.
