

I don't wanna see what I can't say  
I don't wanna breathe what the earth made  
I just wanna be where the hurts stays it goes against me  
One for the fire that you made me  
Holding it down like a black sheep  
Guess where it stands isn't so deep  
It goes against me

It goes against me  
It goes against me  
It goes against me

I don't wanna see what I can't say  
I don't wanna breathe what the earth made  
I just wanna be where the hurts stays it goes against me  
One for the fire that you made me  
Holding it down like a black sheep  
Guess where it stands isn't so deep

It goes against me  
It goes against me  
It goes against me
