

(Hi, welcome)

Lock jaw quick speech  
Couldn't hear you talkin' through the grinding of my teeth  
Let's take a ride  
I haven't left home in a while

Movie muscle my bones ache  
Lights, camera, action, take  
It's not complicated, it's the truth  
I spend my nights thinkin' of you

You don't know me but I love you  
We were meant to be  
My angel baby on the big screen  
Tell them who you need

Say it again, again, again, again  
Again, again, again, again  
Again, again, again, again  
Again, again

Stop by your job to see you in real life (real life)  
You must have thought that I'd forgotten  
Now revving up to retribution  
Spittin' blood on the pavement  
Eyes shut in disillusion  
Maybe this can change it

You don't know me but I love you  
We were meant to be  
My angel baby on the big screen  
Tell them who you need

Say it again, again, again, again  
Again, again, again, again  
Again, again, again, again  
Again, again
