

PUSH

Inner Wave

Take it take it take it take it take it take it take it to the top

I'm already going out my way (ooh)

Wait don't you leave me with so much to say (ooh)

Forget it I'll leave it if you need me I'll be there

Don't deceive me or tease me you won't like me 'cause I'm easy

All along I've been waiting for you by the stairs (ooh)

To do tonight?

We ride our way down

To do tonight?

We ride our way down

Push me if you're looking past

Push me when you make things last

Push me so I'm sitting down with you

Take it take it take it take it take it take it take it to the heart

There's already blood all on the floor (ooh)

Well, I hope that I'm ready for what is in store (ooh)

To do tonight?

We ride our way down

To do tonight?

We ride our way down

Push me if you're looking past

Push me when you make things last

Push me when I'm going fast

Push me just to make me mad oh

Push me if you're looking past

Push me just to make things last

Push me so I'm sitting down with you

Right here with you
