## **Chosen One**

InnerWish

It's the darkest times To conquer all the flaming skies Don't hide away, it's now or never

Red alarm it screams Follow just your heart and dreams In your life there's no surrender

Fly like an eagle tonight Open your wings and lead us to light Show us the rainbow again Together we'll stand at the end

Don't be afraid it's your sacred time Don't let your fears haunt your way Fight for all You have the strength of god You are the holy man The chosen one

Fire storm is closing in A higher voice pushes you in Don't run away, you must believe

Lonely road ahead this night Lord of truth will be the guide Eternity is the inner wish
