

There is no time to lose, just come with me my friend  
Cause from the day we're born we never really cared  
We couldn't find the path to chance for a better life  
In our dreams it was alive, but we never really tried.

No one can tell us what is wrong or what is right.  
No one can tell how we have to live our lives  
We've got to hold on take our future in our hands  
With our hearts our souls and minds to fight until the end

Hold on into our dreams  
Hold on tonight  
Hold on into our dreams Lets hold on tight

Our star is shining still and gliding in the sky  
Breathing the freedom, we are not afraid of dying  
When passion rules the game the blindness lingers on  
Now we dread the path so fast and turn the pain to dust

This is the day my friend to break the prison cell  
To break the rules to crush the boundaries with our hands  
Now it's the time to stand and fight for what we are  
In hearts there is a fire and it's burning with desire

Don't lose your faith,  
carry on and follow the signs  
Then you'll breathe some peace of mind,  
try to be stronger than all.

Just close your eyes  
Feel the warmth after the rain  
That's the way to set you free  
Make your choice before you die
