

## Crimewaves

Interpol

I said I came here with ease  
With my porcelain thumb  
I can see for me  
One day you may just need one  
Well you're just becoming self therapeutic  
I think it's because we're alone

It's the perfect time to try again  
As we slip inside our winter skin  
A sweet incline to a beating heart  
It's all that there ever is

We crimewaves  
Like crimewaves  
Crimewaves

Spray my graffiti  
From my vintage gallant tongue  
Now you see through me  
Until the getting is all done  
Today we all save some forgiveness  
Just for the castaways  
I think it's because we're alone

It's the perfect time to try again  
As we sleep inside our winter skin  
A sweet incline to a beating heart  
It's all that there ever is

We crimewaves  
Just like crimewaves  
Crimewaves

What you need, what you need  
What you know me by, what you know me by  
That's the way (that you know me by)  
That's the way, you will know me by  
What you need
