

Into the Night

Interpol

Step around don't stand there
Waving, son, on abandoned string
Seems to me they took violence for dancing

Steady now who are you betraying
That's some underhanded shit
Time to try some new crime of fashion

Only when the clouds will know me
We all make those faces once
It's solo lonely, old and stony
Into the night we go
Into the night forever

Step it down no separating
All the band you're in
No need to take there's still a way to fence it

We're in here now no sense parading, son
As the anvil swings
We used to say the future was paved with penalties

Only when the clouds will know me
We all make those faces once
'Cause it's solo lonely, old and stony
Into the night we go
Into the night forever

Holly's in the darkness
Holly's in the wild
Sentimental neighbors
Fallen trees are calling me
To guide them through the soil
Into the night

Fate came down on me
We sever together
She's really really warm
Her center can make automatons breathe

Only when the clouds will know me
We all make those faces once
'Cause it's solo lonely, old and stony
Into the night we go
Into the night forever

Holly's in the darkness
Holly's in the wild now
All are sons and daughters
Fallen trees are calling me
To guide them through the soil

People lie in the ground
We saw their shade
People lie in the ground
They saw the other way

Evening snowflake
Time had to go late
But I brought you a piece of pie

Peace and doting
Whole day safer
Is it more than we deserve?
