

## Roland (First Demo)

Interpol

Shhhh  
C'mon, c'mon  
My best friend's a butcher  
He has sixteen knives  
He carries them all over the town  
At least he tries  
Oh, look it stopped snowing  
My best friend's from Poland  
Um, he has a beard  
They caught him with his case  
In a public place  
That's what we, had feared  
He severed segments secretly  
You like that  
He always had the time to speak  
With me and I liked him for that  
He severed segments so secretly  
You like that  
He always took the time  
He always took the time

My best friend's a butcher  
He has sixteen knives  
He carries them all over the town  
At least he tries  
Oh, look it stopped snowing  
My best friend's from Poland  
Um, he has a beard  
But they caught him with his case  
In a public place  
That is what we had feared  
He severed segments secretly  
You like that  
He always had the time to speak  
With me and I liked him for that  
He severed segments secretly  
You like that  
He was growing on me  
He was growing on me
