Blaaargh!!

Into It. Over It.

Can you believe how much we've worked on our technique?
Sunshine for everyone you know
Brian, as we work on scaring you to death
It's become a contest
Of stealth perfection
To always catch you off your guard
We won't have to walk too far
To hide behind a doorway
And burst out screaming your name
If you're outside for too long

If you're seeing clouds of grey
We'll keep seeing sunshine
Everyone you know, Brian, is quiet and crouched down
You haven't made it hard
For a point and click reaction through the lens of a camera-phone

Stealth perfection
To always catch you off your guard
We won't have to walk too far
To hide behind a doorway
And burst out screaming your name
If you're outside for too long

(Behind every doorway you'll find us
You're making it so easy
Around every corner you'll find us
Behind every doorway you'll find us
You're making it so easy
You can't hide
Cause you know we'll always find you
It's alright
It's alright)

And I don't trust us either

(And it's alright
It's alright)
And I don't trust us either

Sunshine for everyone you know, Brian
Making the third verse the same as the first
Cause it works over and over and over and over and over and over and over an
d over again

Stealth perfection
To always catch you off your guard
We won't have to walk too far
We'll hide behind a doorway
And burst out screaming your name
If you're outside for too long

We're behind every doorway
We'll burst out screaming your name
If you're outside too long
