

The Captain Setting The Course From Where We Met

Into It. Over It.

Follow me as we prioritize work over weather
Regrettably, we can never borrow back time from the former
It's as if you hadn't heard a single thing I'd said
I sang a song and now you're longing for the captain setting course from where we met

I can't arrange for better plans in the future
Respectfully, I can never borrow you back from the former
But it's as if you hadn't heard a single thing I'd said
I long for how you're longing for the captain setting course from where we'd met

Time is swimming over swollen mouths
Tempers boil over
Every failure's falling out

Follow me
We're prioritizing work or whatever
Regrettably
I can never borrow back our lives from the former
But it's as if you hadn't heard a single thing I'd said
If these stars can't spell our names then I'll just spell them out instead

'Cause if we go another way, well then we're lost
If you sail another way, well then it's off
So choose to keep me close or keep it up
(Choose to keep me close or keep it shut)
Choose to keep me close but quit repeating if you don't quite understand
(Choose to keep me close but quit repeating if you don't quite understand)

Paralyzed
Pacific time
A positive space in power lines
Settle down
Specific times
A negative space in order size
Frame rates
Keepsakes
A second chance
Goodness for goodness' sake

Times are running over running mouths
Temper's boiling over
Every failure's fallen out
