

# Forest Haven

Invent, Animate

We wait until the best things are gone  
To realize they were the best things  
We wait for the moon to replace the sun  
To think about what weighs us down  
Make me realize just what I have  
I won't leave this earth  
With an uneasy mind

Hold on, hold on  
A future is what I fear  
A future I did not envision  
Hold on, hold on  
A future is what I fear  
A future I did not envision

You've made me, shaped me into  
Exactly who I need to be  
I just want to be there for the end  
I don't want to lose you, but I know I have to  
Left here is the mold of a man  
That you guided, that you guided

A part of me, is you, and we will live on  
I won't let this slow me down  
I won't let this carry on  
If a future is what I fear  
Then I will create my own  
Onward  
Onward to the future I fear so much

We wait until the best things are gone  
To realize they were the best things  
We wait for the moon to replace the sun  
To think about what weighs us down

Hold on, hold on  
A future is what I fear  
A future I did not envision  
Onward, to the future I fear so much  
Onward, to the future I fear so much  
Onward  
Onward

I will face it with my worn down soul
