

Without a Whisper

Invent, Animate

Are you going away
To the place we used to dream of?
Radiance and grace
The only warmth I knew
I know I've been there before with you
(You are)
Now you're fading from me, fading from me
You
You

You
You're fading out of view
And like some kind of heaven
We let the light in
Like some kind of heaven
We disappear

Fading as you sink
So covered in clear
Steering through the sea
Don't wait to breathe
The sun is setting still

I know I've been there before with you
Now you're fading from me, fading from me

You
You're fading out of view
And like some kind of heaven
We let the light in
Like some kind of heaven
We disappear

In the garden grown just for you
A constant dream
Below the earth
Without the feeling of falling deep
It's in you I drown, in you I dream
I know you're fading
You let the light in

And like some kind of heaven
We let the light in
Like some kind of heaven
You're fading from me

You
You're fading out of view
And like some kind of heaven
We let the light in
Like some kind of heaven
We disappear
