Down & Out

InVisions

Yeah
Come on, come on

What do I do? Where do I go
When it gets too hard to fake?
It's all a fucking lie, pull the wool over my eyes
Like a layer of ice on a poisoned lake
Always stuck in the backseat watching it come undone
All the things I could have stopped before they begun
Was it ever enough? Would it even matter?
A natural born disaster

So take a look inside and tell me am I alive?
'Cause the tag around my toe reads "Please do not revive"
I cannot hide, what's lost sometimes should never be found
I'm drifting further just to come back around
I might be up for the minute but I always come down

Someone please
Tear me down, burn me out (Burn me out)
'Cause I am running on empty
I'm running on empty, don't know (Don't know)
If I'll be fine, all in due time
Bury the nightmare or play along
What could possibly go wrong?
What could possibly go wrong?

Let me get a fresh perspective
Let me see that this ain't me
I'm so far gone, I'm past defective
No hope of remedy

So take a look inside and tell me am I alive?
'Cause the tag around my toe reads "Please do not revive"
I cannot hide, what's lost sometimes should never be found
I'm drifting further just to come back around
