Hand in hand, after we climb after the wall

So this world we live in will become even better
Hand in hand, after we climb after the wall
With each other, let's become one love, holding each other's hand

The fire that soars high into the sky
It makes our hearts beat really hard
Everyone stand up
Let's make the path for how we should live

Hand in hand, after we climb after the wall
So this world we live in will become even better
Hand in hand, after we climb after the wall
With each other, let's become one love, holding each other's hand

Wherever and whenever
Let's see our hearts on fire
With our hands opened towards the sky
In the quiet morning let's enjoy the enlightening peace

Hand in hand, after we climb after the wall
So this world we live in will become even better
Hand in hand, after we climb after the wall
With each other, let's become one love, holding each other's hand

Hand in hand
Holding hands
