

# FOLD

ionnalee

I let the days go by  
Thinking of you most of the time  
We go on with our lives  
Meet me here further down the storyline

Think of all the good we had  
The memory stays and I go  
Look at all the beauty we made  
Carefully raised by us both  
Listen to the words I sing  
For this occasion I chose  
For you to have and hold  
Until we meet, until I fold

Shut the door  
Shut my eyes for a while  
My work here is completed now  
Something grows in my body and mind  
And you itched 'til you reached my insides

Shut out the world  
Shut your mouth for a while  
Listen to the scenery of sound  
I can live in this conception of mine  
Live and die on my self-built ground

Think of all the good we had  
The memory stays and I go  
Think of all the beauty we made  
Carefully raised by us both  
Listen to the words I sing  
For this occasion I chose  
For you to have and hold  
Until we meet, until I fold

Switch the lights off  
I travel tonight  
Pack my dearest things  
And leave at first light  
Heading home to where days are nights  
Heading back to where I was found  
You and I, we know about  
We know about the hole in the floor  
You know I will never stop  
Will never stop wanting more

Think of all the good we had  
The memory stays and I go  
Think of all the beauty we made  
Carefully raised by us both  
Listen to the words I sing  
For this occasion I chose  
For you to have and hold  
Until we meet, until I fold

I let the days go by  
Thinking of you most of the time

We go on with our lives  
Meet me here further down the storyline
