

Please drink your wine
Time's passing by
Don't let bad things happen here
It's all on me

Finish your wine
Blindfold your eyes
I will take you where no one's ever been

Just a moment and we reach the Styx
Just a moment cause it's nothing here
For me

For all of you've done with him
For all of you've done to me
For all of your lies
I am so despised
It's more than enough for me

The other side
Like deepest night
I feel I should join you when you here

Just a moment and we reach the Styx
Just a moment cause it's nothing here
For me

For all of you've done with him
For all of you've done to me
For all of your lies
I am so despised
It's more than enough for me
