

# Fly with Me

Iration

Relax

I know you've never been this high before  
The stars, the moons and the constellations  
Let's leave this world and take a trip  
Don't let anybody say you're wrong for taking a lift

Fly with Me

We can't look back let's all just drift away  
Come fly with me  
Safe from the storm the galaxy's where we'll stay  
Fly With Me

We're on that coaster now  
Oh it's such a feeling  
Letting go somehow

Simultaneous being

We're light miles from where we used to be  
Feeling supernatural  
Light from the quasars leads us to our next destination  
Eyes closed as we drift off in meditation  
We're way out past intergalactic  
And I don't think we're coming back

Fly with Me

We can't look back let's all just drift away  
Come fly with me  
Safe from the storm the galaxy's where we'll stay  
Fly With Me
