

By Your Side

Irene

I could never make it alone
I always want to be by your side
I've been lost but i believe in you
won't you see me through oh-oh
The winter's gonna tear up a hole
for all we have to carry inside
I've been down but you can take me higher
won't you light my fire oh-oh

But the road is long
under the golden sun
We need to find a way
Under the cold blue stars
we need to find a way
And in the city night
we need to find a way

I wanna thank you
I wanna thank you cause you light up my life
