

Intercede Light

Iris

11:09

Later on
Road up ahead is long
We're gone
And as the sun breaks
Our alarms suddenly ring their last
There's no more harm

Intercede light
Shine on our darkened minds
Descend light
Show us our new designs
It gets late and far to early for this short life
Can we stay here 'til the sun has died?

Take our own way
Maps are laws
Made to be broken
Let's get lost
There'll be no trace
Of the wars we've won
Only what is left inside
The usher of the better things to come

Intercede light
Shine on our darkened minds
Descend light
Show us our new designs
It gets late and far to early for this short life
Can we stay here 'til the sun has died?

Stand right where you are
Tonight there'll be stars out
Our lights, they align
One step beyond the empyrean

Intercede light
Shine on our darkened minds
Descend light
Show us our new designs
It gets late and far to early for this short life
Can we stay here 'til the sun has died?
