

Speak Out

Iris

You still know
You are still scared of the dark
You still know
Everything leaves a mark

You still feel but you never speak out
Still call when there's no one around

Speak out, tell me things, tell me things
You make noise but you don't say a thing
Speak out with a verse I can sing
If it's something real just tell me

We're so strong
When it's just a lie in your face
We hold on
To anything that gives us away

We're formed from the dirt of the earth
We have no secrets so don't throw me a curve

Just speak out, tell me things, tell me things
You make noise but you don't say a thing
Speak out with a verse I can sing
If it's something real just tell me
Tell me...
Tell me...
Tell me...

Just speak out, tell me things, tell me things
You make noise but you don't say a thing
Speak out with a verse I can sing
If it's something real just tell me
Tell me...
Tell me...
Tell me...
