

Faster Than All

Iron Savior

I remember the day he came
A stranger without a name
Through dust and sand
From no mans land
Faster - faster than all
He draw the guns - never to fall
Furious and wild he rides

In golden light of the dying day
Deliverance came from far away
A silent avenger paying the bad
One by one with flying lead

Pale Rider - faster than all
He shot them down
To bring justice to town
Pale Rider - faster than all
When the time had come
To draw the gun
He's taking an eye for an eye
Draw or die

In the fire and smoke of his roaring gun
He stood alone for everyone
Furious and wild he fights

He shoots to kill
Taking no prisoners
Just taking lifes
And by the morning sun the stranger was gone

Pale Rider - faster than all
He shot them down
To bring justice to town
Pale Rider - faster than all
When the time had come
To draw the gun
He's taking an eye for an eye
Draw or die

In the light of the dying day
He's coming from somewhere far away
Bringing deliverance - taking revenge
