

Firestar

Iron Savior

Beyond the gates of eternity
Beyond heaven and hell
I came to life
Like with a magic spell
Born from the essence
Of the ultimate dream
Titanic force of hope
Half man and half machine

My spirit's flying high
With tears I cannot cry
But yet I am - yet I am

Was I made by the gods
In eternal night
Among a million stars
I saw the light
Dawn of the savior
The only one
Out in the void
My time has come

Codes and patterns and algorithms
Written by mortal hand
In the fire and the ashes
Of a long forgotten land
A voyager without a destination
In space and time
When the gift of life
Was blessing me
And made me divine

Immortal firestar
Until the end of it all
I will be - I will be

Was I made by the gods
In eternal night
Among a million stars
I saw the light
Dawn of the savior
The only one
Out in the void
My time has come

What is my destiny
What is my reason to be
Cause to be

Was I made by the gods
In eternal night
Among a million stars
I saw the light
Dawn of the savior
The only one
Out in the void
My time has come

Made by the gods
In eternal night
Among a million stars
I saw the light
Dawn of the savior
The only one
Out in the void
My time has come
