

darkness of the day

isaac gracie

Shadows converging in my mind
All of the love I've left behind
Drifting into cloudy skies
Get in lost behind your eyes

But now my dreams they come alive
With your kisses, I remember
All those lonely, lonely nights
We got caught out in a rain

Was our love a work of art
Before the painting fell apart
What was that I heard you say
It's just the darkness of the day

And were we better at the start
Before I offered you my heart
Before the demons came to play
Within the darkness of the day

And how can I be so afraid
The broken promises I made
Now I watch your memory fade
Into the darkness of the day

Sinking into isolation
Searching for a motivation
Cuz love is not an occupation
Just a shelter from the rain

Staring out my bedroom window
Thinking baby are you there
Staring out your bedroom window
Baby do you even care

Was our love a work of art
Before the painting fell apart
What was that I long to say
It's just the darkness of the day

And were we better at the start
Before I offered you my heart
Before the demons came to play
Within the darkness of the day

And how can I be so afraid
The broken promises I made
Now I watch your memory fade
Into the darkness of the day

And how can I be so afraid
Broken promises we made
Now I watch our memory fade
Into the darkness of the day

It's just the darkness of the day
Only the darkness of the day

Only the darkness of the day
