Cold Speak

Islander

Sometimes you let your tongue and heart
Get the best of you and me
I'm not trying to be cruel
That's just what we do
You know that it's true

You let the cold speak when you're talking to me
(Just love)
Don't let the cold speak when you're talking to me
(Just love)

Say what you mean, but always love
Say what you mean, but always love
Don't let the cold speak

To be the most beautiful song that I've ever heard
You have to make the notes and melodies find my heart
And twirl me around

You let the cold speak when you're talking to me
(Just love)
Don't let the cold speak when you're talking to me
(Just love)

Say what you mean, but always love
Say what you mean, but always love

Don't let the cold speak
When you're talking to me
Don't let the cold speak

Your mouth is an open grave. Your heart overflows with death
I don't need to see straight through you just to see what's ins
ide
Because to change the fruit, you've got to change the root

Say what you mean, but always love
Don't let the cold speak
When you're talking to me
