

# We Scream

Islander

So you're a blind man  
Call truth a lie man  
Record so clean it gleam like diamonds on your ice, man  
We know you trippin', dippin', sippin' on some turpentine  
Lace your words with cocaine verbs  
Whip us quicker than that lambo time  
Veils you drop like drop tops on that rari  
We all know you copped on lowkey deals where we got robbed  
Hand over fist like you the mob

We scream  
You already know  
You turned your backs on us, we're not letting go  
We scream  
You already know  
You lie, cheat, and steal and we won't let it go

They say that I'm the bad guy, laser beams for eyes guy  
I'm the the Superman no kryptonite  
You can't deflect, you can't deny  
You can run my name through the dirt  
You ain't the first  
Yeah, you is low, but I am the worst  
Considered a curse  
Destined since birth to make sure this justice is served  
I'll carry you if I have to  
Bury you if I have to  
Bound and gagged with that dirty rag I used to clean your mess if I have to

We scream  
You already know  
You turned your backs on us, we're not letting go  
We scream  
You already know  
You lie, cheat, and steal and we won't let it go

Just cause you have the right does not make it right  
Just cause you have the right does not make it right  
Just cause you have the right does not make it right  
Just cause you have the right does not make it right

Just cause you have the right does not make it right  
Just cause you have the right does not make it right  
Just cause you have the right does not make it right  
Just cause you have the right does not make it right

Just cause you have the right does not make it right  
Just cause you have the right does not make it right  
Just cause you have the right does not make it right  
Just cause you have the right does not make it right

We scream  
You already know  
You turned your backs on us, we're not letting go  
We scream  
You already know  
You lie, cheat, and steal and we won't let it go
