

We're All Too Young To Die

Islander

We're all too young to die

We're all too young to die
We're all too young to die
We're all too young to die

To die
We're all too young

You don't know us
It's not our deathbed
You could never figure us out
And you will never figure us out
You will never figure us out

'Cause we don't sing the songs you want
And we could never agree on anything
Agree on anything

We're all too young to die
We're all too young to die
We're all too young to die

Don't say you were there
You were never there for us
Now we're the ones
Living with your struggles and no trust

We're all too young to die
We're all too young to die

We're all too young to die
We're all too young to die

We're all too young to die
We're all too young to die
We're all too young to die
