

Violence in the Street

Israel Vibration

Oh no, oh no Oh no, oh no

Violence in the streets One million running feet Trying to get away From this outrageous gunplay Which seems to make us lack And so it keep us back How will you defeat your enemies ? And you're so outnumbered Gang war fighting here and there Youth and youth deh pon they shoot Ten million screaming voices Hollering from the valley below It was just like in the days of old When Babylon try to control our soul They tried it first and then a gain And so it brought them much pain Then they start to fight again When will we ever learn The way how to make the turn Away from the evil one Who has torment and corrupt the land ? White grain powder in a dem face Watch dem as dem take a nose taste Then them set out To terrorize the place Violence in the streets One million runing feet Trying to get away From this outrageous gunplay
