

Leaving Without You

It Bites

I wish I could die and see what it's like
Where the evil roam my pillow
How they said Goodbye

Out in the city across the city ocean
We lie awake with our hearts on our notions
And every morning we're washing in the water
You play the vicar and I'll play his daughter

Nobody's gonna stop me now
The whole of my life seems so blue without you
Nobodys' gonna stop me now
After all of the things we went through
I'm leaving without you

Out in the city across the city ocean
We're using tears as a magical lotion
And every morning we're dying in the water
You killed the vicar and I killed his daughter

Nobody's gonna stop me now
The whole of my life seems so blue without you
Nobodys' gonna stop me now
After all of the things we went through
I'm leaving without you
