

You know I can't trick you
You love all the things I do
You know I can't trick you
You know all the tricks I pull

Holding you from a darker place
Come inside, change your shape
All I see when I see you
Is all the bad I never knew
All I see when I see you
Is someone that I used to
Care about you
I don't want to
And in my room
You know what to do
About you

Holding you in a brighter place
Come inside, change your shape
All I see when I see you
Is all the bad I never knew
All I see when I see you
Is someone that I've come to
Still care about you
You know I do
But in my room
You know what to do
About you

Holding you in a brighter place
Come inside, change your shape
All I see when I see you
Is all the bad I never knew
All I see when I see you
Is someone that I've come to
Still care about you
You know I do
But in my room
You know what to do
Without you
