All preparations are done, it's over
We'll head straight out into the world, travel
The long, withdrawn night has vanished, we don't stop it
My heart beats, aligning step by step
Everything becomes special in our way

Moments when we were alone
Countdown on our fingers
Just like we imagined
I'm by your side, everyone
We'll become us
Forget yesterday, we're all jumping (Ooh)
Let's fly high with me
Fly one more time, believe in each other

One
Our steps were a bit awkward
Two, slowly, one by one
We start to sync up

Three

Feels like we're dreaming a new dream

Four, a lucky clover

But nothing is better than five

One, two, three, four, five

Hands up to the sky

We make stars shine bright

We are shining brighter

One, two, three, four, five

Heartbeat racing, a feeling of being one

Hey, no, no worries, be okay

Yeah, look at me, look at my face

My way becomes our way

Enjoy freely, shout out if you like, woah (Woah)
