

Maybe this time, no next time,
We'll get our lives right, we'll get it right.
Will we just do what feels good,
And then we know it could cause our souls to drown.

In all the distractions of our lives.

What does it mean to be,
From the light in a world that's speechless,
From the light in a world of darkness.

What does it mean to be,
From the light in a world that's speechless,
From the light in a world of darkness.

Insecurities are breeding inside me,
And they won't let you go to song,
But they won't last against the sword's edge,
The blade, the blade cuts right through wrong.

All the distractions of our lives.

What does it mean to be,
From the light in a world that's speechless,
From the light in a world of darkness.

What does it mean to be,
From the light in a world that's speechless,
From the light in a world of darkness.

I wanna know,
I need to know,
I want to know.
(What does it really mean to be?)

I wanna know,
I need to know,
I want to know.
(What does it really mean to be?)

What does it mean to be,
From the light in a world that's speechless,
From the light in a world of darkness.

What does it mean to be,
From the light in a world that's speechless,
From the light in a world of darkness.
