Wish It All Away

Come a little closer and I will stay with you Let me turn your collar up, up to face the moon Come a little closer, may I fight with you I can try to make you see there's nothing you can do

Breathe the scent of a world gone sour Turn your head as the last spring flower dies now Close your eyes now

And wish it all away wish it all away

May I come and fight with you? I can try to make you see it's not in what you do

Breathe the scent of a world gone sour Turn your head as the last spring flower dies now Close your eyes now

And wish it all away wish it all away

Breathe the scent of a world gone sour Climb to the top of a windy tower in your mind Your mind Close your eyes now

And wish it all away wish it all away
