"There are no bad people in the world"

But what's that?

Deadly criminal, are people really like that?

Actions of humans are worse than brutes

It is so dirty, so foul

I wonder if they call themselves human

Wait, stop, stop, stop, stop, stop, stop, stop

Calm down, down, down, down, down, down, down, down

Yes, go back to the very beginning

Look at them again

Living environment, education, system

What is different from mine?

I'm just relying on you, just one

Human nature, that one

Please be right

But not smart, are people really like that?

Actions of humans are worse than brutes

It is so dirty, so foul

I wonder if they call themselves human

Wait, stop, stop, stop, stop, stop, stop, stop

Calm down, down, down, down, down, down, down, down

Yes, go back to the very beginning

Look at them again

Living environment, education, system

What is different from mine?

I'm just relying on you, just one

Human nature, that one

Please be right

But not smart, are people really like that?

These days the world is smarter  
But filled with things that aren't smart  
Remote conversations filled with anger  
Sacrifice is a matter of time  
Insecure area  
So, too many viruses  
Unconsciously polluting, I can't even evade this  
Now  
Stop, stop, stop, stop, stop, stop, stop  
Change our minds, minds, minds, minds, minds, minds, minds  
We came into the world to the law of cause and effect  
Even so, be careful, everything depends on our minds  
What we make  
Because small beginnings can make huge steps  
The world is changing because there are no bad people

That's right?
