

It's True

J Mascis

And I found a way to get you there, I'm on it
And I am looking but it hasn't happened yet
I'm just lying here, lost in fear, it's rising
It's not the worst, but how bad could it get?

It's true, I knew
What you would do

When I found the way, I wanna say I like it
But it's killing me I don't know where to go
If I show you where my mind is, is it over?
I can't take it back if you don't wanna know

It's true, I knew
What two could do
Let me find the way to go
Let the cracks begin to show

Let me find the way to go
Let me find it so I know

Well, I found the way and you're not gonna like it
But it's best to get it over with and done
I'm not thinking that you're gonna wanna try it
But I'm still hoping you won't get up and run

It's true, I knew
What you went through
It's true, you knew
My back might crack

Let me find the way to go
Let me find it so I know
Let me find the way to go
Let the cracks begin to show
