Right Behind You

J Mascis

Talking about you, me
Where we thought we'd be
Right behind you
We can't believe it's me

Walking past the house where everybody goes
We got time to fix it, lift it from below
Stuff the pain inside now fall and winter show

Do we got to crate it?
You don't wanna know
Talk about true, free, all we needed to be
Looking through you, me
Trying to believe

When a smile exposes everything you fear
I would go inside, but you just disappear
I can't wait it out, and you can't wait to hear
If you really need it, I'll be coming clear

Right behind you, me
Where we thought we'd be
Can't describe you
We never get to see

Up inside me, you won't find me
All the timing, falls inside your head

Up inside me, you won't try me
Docked and lively
Won't expect you to

You, me
Where we thought we'd be
Right behind you
We can't believe it's me
Talking about true, free, all we needed to be
Right behind you, me, trying to believe
