

Free (Don't Ask Me)

Jace Everett

Now I believe and everything I see
Is black and white to me
Without trying

The world is right
The stars up in the sky
They shine their little lights
Just for me

Yeah it's true
They shine their light for me and you

And we're free
Not sure just what that means

So come along
And sing this simple song
You know it can't be wrong
If it feels right

When you're here
I think it's very clear
That you don't need to talk
Or think at all

Not at all
No need to talk at all

Cause we're free
Please don't ask me what I mean
