

Little Pill

Jace Everett

This little pill gonna kill my fever
This little pill gonna kill my pain
There's something coursing through my veins
What it is I can't explain
Fever

I don't know why but I think I'll leave her
I don't know why but I just can't stay
This little pill here in my hand
Got me feelin' like a man
Fever (leave her)

I wonder if I'll ever breathe again
My mind's goin' places I have never been
Twitching in my bed thinking this is the end
But it's just fever
Oh, fever...

Watch me fall into oblivion
Self-destruction you're my oldest friend
It's just a dream I know what it means

This little pill gonna kill my fever
This little pill gonna kill my pain
There's something coursing through my veins
What it is I can't explain
Fever

There's a feeling rushing through my veins
I pray it never goes away
Fever

Fever...
I got a fever...
Fever...
Oh yeah...
