

Our Song

Jack & Jack

I don't wanna wake up if you ain't the first thing I see
I wanna make love
I don't wanna think too much I'm feeling your vibration
Baby this is our song don't you change the station
Don't you change the station

You said something bout me
I know all of your friends
They tell me everything, everything
And I can't get enough
Fantasies about you
So we could never be friends
Nothing I wouldn't do to be with you

I don't wanna wake up if you ain't the first thing I see
I wanna make love
I don't wanna think too much I'm feeling your vibration
Baby this is our song don't you change the station
Don't you change the station

I don't wanna wake up if you ain't the first thing I see
I wanna make love
You and me together it's the perfect combination
Baby this is our song don't you change the station
Don't you change the station

Done with faking
All the ways I feel about you
Sick of waiting
For the time to make the right move
Decorations
I want all your things in my room
Never waste a minute
By your side

I look at your face I feel alive
Let's make this up as we go
Girl that's the vibe
Hard to think about what life was like without you around
I'm so lucky can't believe what I found

I don't wanna wake up if you ain't the first thing I see
I wanna make love
I don't wanna think too much I'm feeling your vibration
Baby this is our song don't you change the station
Don't you change the station

I don't wanna wake up if you ain't the first thing I see
I wanna make love
You and me together it's the perfect combination
Baby this is our song don't you change the station
Don't you change the station
