

Old Enough

Jack Garratt

(We should be old, oh, oh)
(We should be old, oh, oh)
(We should be old, oh, oh)
(We should be old, oh, oh)

All-nighters, first-timers
Searching through the dark
We found love, we found love
Cheap logic, shallow pockets
Bite before we bark
We found love, we found love

We should be old enough to get things started
We should be old enough to get things started

Long summers, short tempers
Burning through the fuse
We found love, we found love
Known winners, old singers
Gambled with our youth
We found love, we found love

We should be old enough to get things started
We should be old enough to get things started
We should be old enough to get things started
We should be old enough to get things started

We should be old, oh, oh, oh
We should be old, oh, oh

Stripped wires, dying fires
Knives in every back
We found love, we found love
Fucked over, buried under
Your hand reached through the crack
We found love, we found love

We should be old enough to get things started (We should be old
, oh, oh)
We should be old enough to get things started (We should be old
, oh, oh, oh)

We should be old enough to get things started
We should be old enough to get things started
