

## Knack For It

Jack Harlow

Off the backboard  
I was thirty-minutes, he was hopping off the back porch  
Tell me what you bad for, tell me who you good to  
I'ma need a magazine or something I could look through  
I been waiting  
For, you to break up with your man  
I seen him on the 'Gram and I ain't really a fan of y'all's  
Situation, you gon' get tired, real tired tryna' make sense  
Of how the fuck my day spent  
Do you got issues with me  
Tell me right now before you get rude with me

She got a knack for it  
Even my best friend done fell in love with her before  
Ain't gotta act forward  
I know what you on, you should know that I done been here before

You need a passport  
So when I'm on the road you can pull up, girl, with me on the tour  
That sounds fire, takin' out the trash when you pulled up outside  
I was lettin' out sighs of relief that I still got some more time with the scenes  
Prayin' on, any sign of a weakness  
I ain't trippin' in the least bit  
You got problems that you need fixed  
I got me a couple too, I know what you mean  
She was disappearin', I ain't notice a thing  
It might be better that way

She got a knack for it  
Even my best friend done fell in love with her before  
Ain't gotta act forward  
I know what you on, you should know I done been here before  
She got a knack for it  
Even my best friend done fell in love with her before  
Ain't gotta act forward  
I know what you on, you should know I done been here before
