

Calm Down

Jack Johnson

Yeah, calm down
I'm right here with you, let's calm down
And when this world, it won't calm down
Come over here and let's calm down

Sirens sing from far away
Charm the wind and wonder why you
Been so lost, been so long
Been too many things gone wrong and

How low until the bottom?
Echo, echo, echo, echo, then you let go
How low? Nobody knows
Who can you trust if you just can't

Calm down
I'm right here with you, just calm down
And when this world, it won't calm down
Come over here and let's calm down

Find the words, words will change
Gone tomorrow, here today and
No lost time if there's no time
Only echo's to remind us

How low? These washed-out roads
(Echo, echo, echo, echo, then you let go) where these tired feet fall
(How low?) People come and go (nobody knows)
Won't you come to me and

Calm me down
I'm right here with you, let's calm down
And when this world, it won't calm down
Come over here and let's calm down

We got to, got to calm down
And then you [?] calm down
And then you [?] calm down
