

# Constellation Ball

Jack River

I am at the constellation ball  
With all the trippers and the physicists  
Here, they do not keep the dogs on leads  
They let their animals run free, we used to be so free

Moving in the dark  
I knew it from the start  
You'd have my spaceship heart  
From the planets and the stars  
Wish you could see it from afar  
How beautiful you are  
Before you fall apart  
Before you fall apart  
Before you fall apart  
Before you fall apart  
Before you fall apart

Are you in love? Are you, are you in love with the butterfly?  
As she tries, as she tries to leave  
Take a picture, take a picture  
As she falls to fly, we used to be so free

Moving in the dark  
I knew it from the start  
You'd have my spaceship heart  
From the planets and the stars  
Wish you could see it from afar  
How beautiful you are  
Before you fall apart

Capture me a million times  
Don't use the camera in your mind  
It might tell a million lies  
They might conquer you  
Climb the mountain, run inside  
You were born to ask it why  
'Cause they will tell a thousand lies  
They might conquer you, and

Moving in the dark  
I knew it from the start  
You'd have my spaceship heart  
From the planets and the stars  
Wish you could see it from afar  
How beautiful you are  
Before you fall apart  
Before you fall apart  
Moving in the dark  
I knew it from the start  
You'd have my spaceship heart  
From the planets and the stars  
Wish you could see it from afar  
How beautiful you are  
Before you fall apart  
Before you fall apart  
Before you fall apart  
Before you fall apart

Before you fall apart
