

Infinity Roses

Jack River

Infinity roses as she walks by
And all the angels surround her tonight
Light years and a thousand heavy miles
And every piece of salty water
That runs from your eyes

They can hold you down
But they can't take your crown
They can tell you no
But baby you will still go
A hundred lights, a hundred times
I won't leave you tonight
And it's never goodbye

Running through the hall
Blue waterfalls and infinity roses
Too bright, too bright
All angels have her tonight
Walking around singin' your favourite song
Like nothing's wrong
Sing with me now
Sing with me now

They can hold you down
But they can't take your crown
They can tell you no
But baby you will still go
A hundred lights, a hundred times
I won't leave you tonight
And it's never goodbye

They can hold you down
But they can't take your crown
They can tell you no
But baby you will still go
A hundred lights, a hundred times
I won't leave you tonight
And it's never goodbye

It's never goodbye
It's never goodbye
It's never goodbye
It's never goodbye
It's never goodbye
It's never goodbye
It's never goodbye
It's never goodbye
It's never goodbye
