Nothing Has Changed

Jack River

I am driving down the coast
To meet my best friend at the show
It's been one whole year without you
I'm a stranger so alone

We were so close together
Haven't seen you in forever

Nothing has changed
Everything's in its place
I was afraid
This moment would never come
Nothing has changed
Pick up where we left off
You're just the same
You're everything I forgot
Nothing has changed

I've missed the little things
The way you're screaming at the door
All the places we were going
Now the passports on the floor

We were so close together
Haven't seen you in forever

Nothing has changed
Everything's in its place
I was afraid
This moment would never come
Nothing has changed
Pick up where we left off
You're just the same
You're everything I forgot
Nothing has changed

Dreams hung in the wings
Everything we worked for
Turning into dust
Everything we'd hoped for
Packing up the stage
Going home on planes
Running 'til we fall over
At the soho show

Nothing has changed
Everything's in it's place
I was afraid
This moment would never come
Nothing has changed
Pick up where we left off
You're just the same
You're everything I forgot
Nothing has changed
