Late Night

Jack Savoretti

I dedicate tonight
To you and to me
It's clear in my mind
No sunlight, no sleep
A sky full of diamonds
Our song on repeat
We sing along to every word
Never miss a beat

Don't hold back
Just let go
Can we live this stuff forever?

Late night
The stars are shining brighter for you
Late night
Driving down the avenue
I can't get enough of you

Take my breath away
I just want to stay in the late night
In the late night
Late night
I just want to stay in the late night
In the late night

Wide awake dreaming
Don't let it in
So many possibilities around the bend

Don't hold back
Just let go
We can live this stuff forever

Late night
The stars are shining brighter for you
Late night
Driving down the avenue
I can't get enough of you

Take my breath away
I just want to stay in the late night
In the late night
Late night
I just want to stay in the late night
In the late night

Get lost with you
You and me get lost in the late night
Get lost with you
You and me get lost in the late night

Late night
The stars are shining brighter for you
Late night
Driving down the avenue
I can't get enough of you

Take my breath away
I just want to stay in the late night
In the late night
Late night
I just want to stay in the late night
In the late night

Get lost with you (Late night)
I just want to stay in the late night
In the late night (Get lost with you)
Late night
I just want to stay in the late night
In the late night
