

Let's Start All Over

Jack Wagner

Let's start again

I wake up cold and lonely
In a place I've been before
I swore these times were over
Close my eyes
Then passion fills my fingers
I grab the phone, you say "hello"
You're all I have to turn to
Listen to me, you're right, I tell you, baby

Let's start all over
And find a way to make it all right
Baby, let's start all over
I won't be the same 'til I know your love is mine

I can't control my feelings
Especially when you're away
I know there's nothing better than your love
I want no more pretending
I need to know right here and now
Do you think I'm crazy?
Hoping you and me can find each other

Let's start all over
Find a way to make it all right
Baby, let's start all over
I need to know that there's something there
So let's start all over
Take a chance before it's too late
Baby, let's start all over
I won't be the same 'til I know your love is mine

Let's start again

Baby, let's start all over
Find a way to make it all right
Baby, let's start all over
I need to know that there's something there
So let's start all over
Take a chance before it's too late
Baby, let's start all over
I won't be the same 'til I know you're there

So let's start all over
Find a way to make it all right
Baby, let's start all over
I need to know that there's something there
So let's start all over
Take a chance before it's too late
