

I Won't Let You Go

Jackie DeShannon

I won't let you go don't care what you say
I just have to have you near me

Oh, people laugh and talk
But that don't bother me
What I want is what I see

You're the breeze that flows
Down the winding road
You're the only one who grooves me

And by your vibes I know you're my melody
And I want you here with me, ah yes

You're my everything i could ever want
You have got that certain something

When I look at you way down deep inside
There's a feeling I can't hide it
Can't deny it i can't hide it
Down inside of me

I won't let you go don't care what you do
We're a perfect combination

And when the winter's cold
I will hold you tight
Keep you warm all through the night

Even though they say it's wrong
Our love's burning, burning, burning
Oh, so strong

I won't give you up, oh no
I won't ever, ever, ever let you go

When everything is said, said and done
I won't let you go for anyone
